
InstaRefine

- ANDROID IMAGE EDITOR

EISHA RIZVI & JACOB REMPEL

A mobile app designed for Android that provides users with a powerful yet simple way to edit images on the go. The app will focus on user-friendliness, offering intuitive controls and essential editing tools for quick enhancements or in-depth adjustments.

- Dart: A programming language for app logic
- Flutter: Framework for building the user interface
- Android SDK: For deploying the app to Android
